COVID-19 MYTHS & FACTS

COVID-19 is having a devastating impact on our community. You deserve accurate information so that you can make decisions for yourself and your family.

MYTH: COVID VACCINES CHANGE YOUR DNA.

FACT: COVID-19 vaccines are designed to **help your body's immune system** fight the coronavirus. The messenger RNA does enter cells, but not the nucleus of the cells where DNA resides.

MYTH: VACCINES CAN GIVE YOU COVID-19.

FACT: It is impossible for you to become infected with COVID from current vaccines, because they **do not contain a live virus.**

Side effects like fatigue, headache, runny nose, & soreness are normal. Plan to rest after you get your shot.

MYTH: VACCINES ARE NOT EFFECTIVE.

FACT: People who are vaccinated are much **less likely to get COVID.**

Those who do are less likely to become severely ill or die of COVID, and spread less of the virus to others.

MYTH: COVID VACCINES ARE NOT SAFE FOR PREGNANT PEOPLE.

FACT: Experts recommend that COVID-19 vaccines be available for anyone who is pregnant, breastfeeding, or may want to become pregnant.

In fact, **pregnant people who get COVID are more likely to die,** give birth pre-term, or develop pre-eclampsia.

Additionally, there is no evidence that COVID-19 vaccines cause infertility.

MYTH: KIDS CAN'T GET SICK OR DIE FROM COVID.

FACT: More children are testing positive for COVID. While hospitalization and death from are unlikely for children, kids who are hospitalized now are **sicker than before,** and some have died.
